

OUTLINE FOR CARICOM REGIONAL STANDARD
COCOA BEANS – SPECIFICATION AND QUALITY REQUIREMENTS
(ISO 2451:2017, MODIFICATION)

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Preparation
5	Requirements
5.1	General requirements
5.1.1	Odour
5.1.2	Adulteration
5.1.3	Living insects and other infestation
5.1.4	Violet or purple beans
5.2	Specific requirements
5.2.1	General requirement
5.2.2	Cocoa related matter
5.2.3	Flat beans
5.2.4	Foreign matter
5.2.5	Moisture content
5.2.6	Sieving
5.3	Other quality characteristics
5.4	Grade determination
5.4.1	Classification for cocoa beans
5.4.2	Substandard cocoa
5.5	Bean size
6	Sampling
7	Test methods
8	Packaging
9	Marking
10	Test report

OUTLINE FOR CARICOM REGIONAL STANDARD
COCOA BEANS – SPECIFICATION AND QUALITY REQUIREMENTS
(ISO 2451:2017, MODIFICATION)

Annex A (normative) Flowcharts

Annex B (normative) Method for determination of the sieving

Annex C (normative) Method for determination of cocoa related matter, flat beans and foreign matter

Annex D (normative) Method for determination of the bean count

Annex E (normative) Method for the cut test

Annex F (normative) Methods for determination of moisture content (oven method)

Annex G (normative) International trade classification for fermented beans

Annex H (informative) Storage of bagged cocoa

Annex I (informative) Disinfestation

Annex J (informative) Procedure and flowchart for preliminary quality analysis

Annex K (informative) Example of a sample test report template

Annex L (informative) Technical deviations
